

## CVD MANAGEMENT TOOL SUPPORTING PRIMARY & SECONDARY PREVENTION NEEDS

- Easy to use dynamic report manager providing prioritised lists ...
  - review 'at risk' & sub-optimally treated patients
  - identify and prioritise necessary interventions
  - review success of current treatment versus guidelines
  - manage patients and their vascular risk more effectively and efficiently (JBS2, QRISK2)
  - validate disease prevalence
- Holistic approach to CVD management - quickly sort and view on
  - clinical values, severity of disease, risk factors & drugs
  - choose all CVD diseases or specific disease analysis
- Enables optimum practice and PCO resource management
  - action plans to target interventions & resources with clinical need

*"The GP's have been very impressed. They can see the benefits to both patients and practices alike."  
"The time saving will be enormous ... it would take days to collate all of this data and review it—I was able to apply filters and have the information to hand that allowed easy audit and delegation of tasks".*

*Practice Manager*

CVD Navigator ... easing the pressure!
